

Wytec Full-Stack Web Developer

Wytec International is seeking a zealous, in-house Full Stack Web Developer for immediate hire within its Marketing Department. Our developer must be ready to contribute in all stages of software development for its four sites. The position is best suited for experienced and determined developers seeking the opportunity to join an entrepreneurial and rapidly growing company.

Responsibilities:

- Develop concepts to improve and implement responsive web design
- Work with the marketing team to develop and launch new features and continuously optimize our websites
- Maintain, expand, and scale our site as assigned.
- Experience working with graphic designers and converting to visual elements.
- Maintain code integrity and organization
- Develop and extend Wordpress themes and plugins using strict standards and best practices.
- Keep up-to-date with emerging technologies and industry trends and apply them into operations and activities.
- Implement tags, data layers, and triggering rules
- Experience with front-and-back-end programming languages
- Analyze user needs to implement web site content, graphics, performance, and capacity
- Understanding and execution of security and data protection.
- Provide quality assurance control and cross-browser/cross-platform compatibility on all projects
- Basic understanding of System administration such as Virtualization, Networking, Cloud environment.
- Familiarity with moving a website to a new hosting platform.

Requirements/Skills:

- 3-5 years of professional experience in full stack web development is required
- Minimum 2 years' experience with WordPress, including working in themes/templates
- Must live in or near San Antonio, Texas (remote not available)
- Proficiency with front-and-back-end languages: HTML, CSS, JavaScript, PHP, SQL, Python, etc)
- Has experience designing and developing web applications
- **Portfolio** must be provided, including languages used
- Bachelor's degree in Computer Science or associate degree in related field (BA or BS preferred)
- Be familiar with industry best practices and open-source enablers
- Utilize data from various back-end services and databases.
